Admin Tools – Administrative tasks made simple

With Admin Tools, you can easily create and delete elements, change group memberships, adjust user properties such as the user type,or copy web map symbologies, among other things. This makes it possible to perform a wide range of administrative tasks related to elements, users, groups, and workflows more efficiently and easily. Since these tasks can also be performed as bulk operations, the amount of work required is reduced to just a few steps. As a result, daily administrative tasks can be completed in a much shorter amount of time.

Advantages

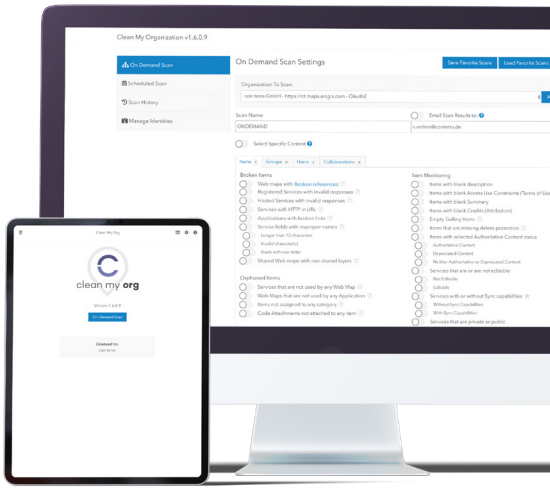

- Performing bulk operations on elements, groups, users, and workflows
- Easy onboarding into ArcGIS® administration
- Environment-wide search function and advanced filter options
- Intuitive user interface
- Extended functionality for interacting with content
- Minimized effort for administrative tasks
- Significant time savings

Clean My Org – Effectively clean up your ArcGIS organisation

With Clean My Org, you have access to a needs- and time-based scanner that checks for common issues in your ArcGIS environment. These include, for example, inactive users and groups, unused elements, and broken maps and references. Using the built-in resolution tools, you can fix the identified issues directly from Clean My Org with minimal effort.

Advantages

- Easily check users with a specific attribute (e.g., no content)
- Intuitive group management
- Easily verify the functionality of collaborations
- Continuous and organized cleanup of your ArcGIS environment
- Reduce duplicates or unused elements
