

con terra

con terra develops, integrates and operates customised GeoIT solutions for customers from the private sector and public administration. From focussed apps to smart data solutions, the use of AI, spatial UX and cloud strategies to digital twins, con terra has been providing comprehensive, competent and holistic advice, implementation and support for over 30 years.

con terra is a platinum partner of the world's leading technology provider for geographic information systems Esri Inc (ArcGIS) and a value-added reseller of Safe Software (FME). The portfolio is supplemented by complementary products such as map.apps and security.manager as well as other technologies.

The technical focus is on insurance, nature and environment, telecommunications, retail, e-government, infrastructure and real estate markets.
